Dreer Quality VEGETABLE SEEDS for Market Gardeners

Every successful market grower realizes the tremendous importance quality seeds play in the production of profitable crops. The market gardener who makes his livelihood from the sale of the produce grown cannot afford to sow seeds of doubtful value. He must have highly bred strains carefully selected from vigorous parent plants that show all the typical characteristics of the true variety. They must be full of vigor and vitality to make a sturdy growth from the start. More than three generations of market growers have realized that they can depend on Dreer's to supply them with the finest in Vegetable Seeds.

Our list of varieties includes the choicest strains of all the best standard sorts but we recommend particularly making thorough trials of the many new varieties because they have proved superior in many sections. Higher yields, better quality, and disease resistance are important factors that distinguish many of the newer varieties.

DREER'S SELECT DAHLIAS

For some years now there has been a strong and distinct trend toward Miniature Dahlias on account of their usefulness for home and garden decoration. We therefore have given special attention to these small-flowered types as we believe their popularity will increase still further as soon as the public becomes more fully acquainted with their possibilities.

Miniature Dahlias

The ideal type for home decoration since it makes up into graceful baskets and vases. The blooms are less than 3½ inches in diameter and they are borne on compact plants of moderate height with the flowers displayed on good wiry stems. They come in both Decorative and Cactus form.

Baby Royal (S.C.). Semi-Cactus. The flowers are bright salmon-pink shaded with apricot and displaying a rich yellow tone at the base of each petal. Very popular.

Baby Sagamore (F.D.). A model of perfection with lovely Formal-Decorative blooms of a bright golden yellow color carried on extra-long stems. Blooms continuously from early in the season until frost.

Bishop of Landaff (Duplex). The sensational effectiveness of this charming Decorative variety has made it one of the most popular sorts for garden and cutting purposes. The bright scarlet flowers with deep garnet center harmonize wonderfully well with the deeply lacinated dark bronze foliage. You need this to attract attention. Of duplex form.

Coralette (F.D.). An exquisite variety of a most appealing salmon-red color.

Corinna (F.D.). Perfectly formed, pure yellow Formal-Decorative. One of the best in the collection and the only pure yellow. Unsurpassed for the garden and for cutting.

Donau (F.D.). Dainty soft silvery rose flowers produced freely on strong wiry stems. A graceful variety.

Rapture (I.D.). Elegant blooms of bright rose-pink shading to sulphur yellow at center with golden suffusion. A most abundant bloomer and robust grower.

Red Head (F.D.). Of unique Formal-Decorative form. A striking bright red flower.

Rose Beauty (I.D.). Soft peach with coral suffusion. The blooms are uniform and perfect, with the centers full throughout the season. Fine long stems and therefore ideal for cutting.

Any of the above, tubers only: 18c each; \$15.00 per 100.

F. D. = Formal Decorative
I. D. = Informal Decorative

C. = Cactus
S. C. = Semi-Cactus

Dainty Pompon Dahlias

The rapidly increasing popularity of the small ball-shaped or Pompon Dahlias is justified by the diversity of their use and their adaptability. In the garden they make small decorative plants with an abundance of flowers which are splendid for home decorations, particularly for tables where their size and daintiness makes them most appealing. The small ball-shaped flowers seldom exceed two inches in diameter. The twelve varieties listed below represent the most outstanding ones not only as far as color and shape are concerned but also in regard to habit of growth and flower production.

Aimee. Well-formed blooms of an appealing bright salmon with rich apricot shading.

Arthur. A splendid bright red of artistic appeal.

Bob White. Milky white, tinted yellow when opening. Especially fine for cutting, forming a low well branched bush and carrying its flowers on fine long stems.

Dandy. Pretty orange blooms of perfect form.

Gretchen Heine. Rose, tinted white, and tipped carmine. Free and long stemmed.

Joe Fette. A perfectly formed and reliable white. Splendid for florist use and an early bloomer.

Jonkheer von Citters. One of the daintiest and most interesting sorts. The petals are yellow, tipped red.

Little Edith. Yellow with orange tips. One of the very bright ones. Of perfect form and uniform size.

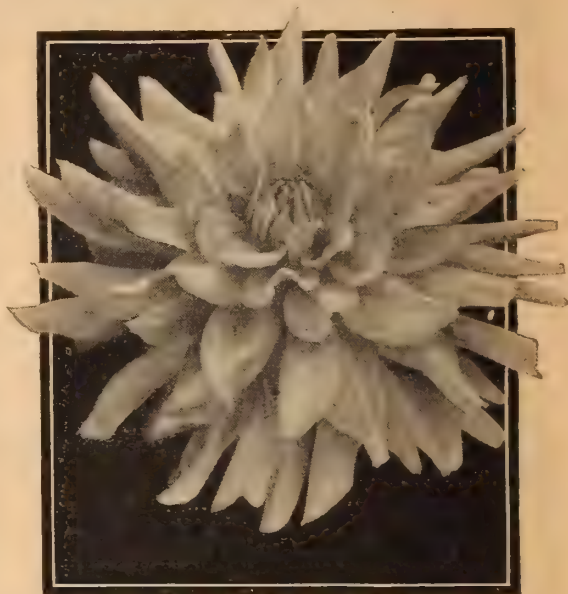

Morning Mist. White with the tips of the petals shading to pink giving the whole flower a dainty light pink appearance. An excellent cutting variety with long stems. The blooms are a trifle larger than most others.

Nellie Frazier. Cheerful little blooms of an enchanting bright pink color.

Thilda Lux. A vigorous variety with substantial yellow blooms.

Tom Thumb. Deep garnet. Of even form and most desirable.

Any of the above, tubers only:
12c each; \$10.00 per 100.

Sanhican's Sweetheart

Sanhican's Sweetheart (C.) Very free flowering Cactus of a clear yellow suffused with red. Our fields of this variety were a mass of bloom from early in the season until digging time. Very useful for cutting.

Snowsprite (S.C.). One of the best white miniature Dahlias with elegant fully double blooms. Fine for cutting and very attractive in the garden because of its sturdy habit and free-blooming habit.

Dwarf Bedding Dahlias for Forcing and the Garden

This new race of dwarf compact plants is excellent for spring forcing in addition to its use for garden decoration. The plants though decidedly dwarf bear flowers as large as those found on the old-fashioned giant Dahlia.

Their value for garden planting lies not only in the dwarf compact habit of the plants but also in their free flowering character, the size of the individual blooms, and the many splendid colors available in this type.

Christine. Pure white flowers of small size. Blooms profusely.

Eleanor. A real acquisition with an abundance of brilliant orange-crimson flowers measuring 4-5 inches in diameter. The plants seldom grow more than 15 inches tall and they are covered throughout the summer months and until freezing with a profusion of blooms.

Elsie

Elsie. Deep golden yellow passing to rich orange-carmine toward the tips. Of good size and excellent form.

Gerda. Very double lilac-rose flowers measuring 5-6 inches across. They are borne profusely throughout the summer and fall. This variety is particularly recommended because of its superior vitality.

Kate. Showy bright orange-scarlet flowers of formal contour.

Maria. An exceptionally fine bedding Dahlia with showy pure white blooms which are larger and more double than those of Easter Greeting.

Ursula. An intense crimson with carmine reverse. Flowers comparatively large.

Any of the above:

Green plants only, ready May 15.
3-inch pots: 23c each; \$25.00 per 100.

Jersey's Beauty

Six Popular Giant Dahlias

Gallant Fox (F.D.). Luminous dark claret-red flowers measuring 6 inches across.

Jane Cowl (I.D.). There are few shows where Jane Cowl does not stand out with its huge bronzy old gold blooms majestically displayed on fine long and strong stems.

Jersey's Beauty (F.D.). This has proved one of the most popular of all Dahlias and indeed the bright pink blooms are exquisite in every detail while the habit of the plants and the free flowering character never have been excelled.

Thomas A. Edison (F.D.). Gorgeous blooms of a distinct rich royal purple.

Treasure Island (F.D.). Bright apricot suffused with gold. Very dependable and free flowering.

White Duchess (I.D.). High-centered, handsome white flowers with broad wavy petals borne on strong, stiff stems. Extremely large and free flowering.

Any of the above:

Strong tuber divisions 14c each; \$12.00 per 100.

Five Newer and Finer Giant Dahlias

Harvest Moon (F.D.). Every plant covered with a host of shining clear yellow flowers shading deeper in the center. Not necessary to disbud to produce fine, perfect blooms.

Mrs. Herbert O'Connor (C). There is an indescribable loveliness to this splendid Cactus Dahlia. The plants carry a great profusion of bright rose-pink flowers with deeper shadings in the center on slender but wiry stems. It is a vigorous grower.

Ruby Taylor (F.D.). This great favorite has elegantly formed, large blooms of an appealing deep ruby red color.

Southern Cross (Croix du Sud). A most unusual and outstanding variety. The flowers measure 6-8 inches in diameter and have only a single row of deep blood red petals with the center being built up with a mass of golden tubular petals forming a deep pincushion. As attractive as it is unusual.

White Prolific (F.D.). This extremely free-flowering, well-formed early white is aptly named. Makes a most satisfactory cut flower.

Any of the above:

Strong tuber divisions 23c each; \$25.00 per 100.

The Dreer Rose Garden at Riverton, New Jersey

Anyone interested in Roses should make it a point to visit the Dreer Rose Garden at Riverton, New Jersey, in late May or early June and again in late fall when the Roses are at their best.

DREER'S SELECT Hardy Perennial Plants

Specially Grown in Pots for Outdoor Planting

Most of the stock offered is pot grown. This does not mean that the plants have been entirely pot grown but that they have been field grown, dug and potted during the fall months. Such stock may be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

The "hundred rate" applies to 10 or more of a variety.

Dreer's Hardy Garden Chrysanthemums

No plants in our gardens attract more attention in the fall of the year than these Hardy Garden varieties. Blooming, as they do, after practically all other garden flowers have passed away, they enliven the autumn landscape with their brilliant flowers so profusely displayed. With reasonable care they are absolutely winter hardy and their acquisition brings a permanent addition to the garden.

In the following lists we present the result of over a quarter century of painstaking selection and hybridization. While many old favorites may be missing, you may rest assured that they have been replaced by varieties which have proved superior in some desirable characteristic. We believe we have the most worthwhile collection of this class of plants in commerce.

Wholesale prices quoted are for strong 2-inch pot plants ready for delivery after March 1st.

Three New Korean Hybrids

Eugene A. Wander. Coming into flower in late September it is soon a gorgeous glistening mass of double golden flowers, sometimes tinted bronze. It blooms so freely that the plant is almost completely obscured. Very hardy and vigorous, and requires no special pinching to produce flowers 4½-inches across. They grow larger if disbudded. 20c each; \$17.00 per 100.

Milky Way. Forerunner of a distinct new type of Chrysanthemum. Buds are a creamy yellow, opening into flowers of the most intense milky white in marked contrast to the rich green foliage that covers the plant. The handsome, semi-double, informal blossoms with broad overlapping petals of unusual texture are carried in branching sprays of 5 or 6. More frost resistant than any other early white and perfectly hardy. 18c each; \$15.00 per 100.

Mrs. Pierre S. du Pont III. This sensational variety comes nearer to perfection than any variety we know. The dominant color is a soft peach-pink, tinted with rosy salmon and fawn, overcast with a luminous sheen and presenting an entirely new color effect. The very large, shapely, double flowers are borne on vigorous, hardy, free-branching plants. In full flower in early October. 20c each; \$17.00 per 100.

Double Flowered Korean Hybrids

Much progress has been made in the last few years in the production of double forms of the popular Korean Hybrids. We offer a choice collection below.

Caliph. Deep oxblood-red with a rich velvety sheen. Very showy and greatly admired.

Mandarin. Coral, salmon, and bronze blended to make a very attractive flower. The plant is compact but the blooms are carried on stiff wiry stems.

Pale Moon. Fluffy sulphur-yellow flowers completely covering the compact plants. A new color in this type and very promising.

Roberta Copeland. A very unusual rose-red which matures as a salmon bronze. It is an early bloomer starting about middle of September. 2 ft.

Rose Glow. Appealing old rose blooms borne in great profusion on plants reaching about 2 feet high. Blooms about October 5.

Sequoia. Elegant, good sized, double blooms of a mellow amber color.

Symphony. Mauve-rose overcast with soft coppery tints giving the flowers an unusually different and attractive appearance. Of strong healthy growth.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

May we have the pleasure of your visit during Chrysanthemum blooming time which with us is at its height during the second week of October. You will be very much interested in our display grounds of these at the Dreer Nurseries, Riverton, New Jersey.

Extra Early Double Large-Flowered

While all the varieties offered by us are early flowering, the following bloom from one to two weeks earlier than the general collection.

Abundance. A wonderful new salmon-red with golden reverse. Exceptionally free flowering, compact plant.

Aglow. Double flowers of deep bright orange color. Very brilliant and a most appealing color.

Carrie. A most satisfactory deep canary yellow.

Glorietta. Very double ball-shaped light pink. Of rather dwarf growth but very free flowering.

La Somme. Very dependable early mauve-pink.

Tasiva. Large free-flowering pure white of compact form.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

Auburn

Extra-Early Flowering Korean Hybrids

These six extra-early flowering Korean Hybrids, introduced by us in 1936 and 1937 have won universal acclaim. They make graceful free flowering plants blooming ten days to two weeks earlier than varieties previously introduced.

Auburn. Compact plants producing an abundance of single flowers, which open a coppery red and change with age to salmon-flesh.

Fortuna. Very vigorous plants of medium height covered with unique curly-petaled oxblood red single flowers, 3 to 4 inches in diameter.

Niobe. A vigorous plant of dwarf compact habit. Single clear glistening white flowers with yellow discs covering the plant completely.

Sappho. Compact dwarf plant with an abundance of single yellow flowers.

Stellaris. Large single Buttercup-yellow blooms. Graceful and vigorous.

Vesta. A plant of medium height and great vigor, literally covered with single deep golden orange flowers over 2½ inches in diameter.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

Chrysanthemum and Its Culture

(Edward A. White). A complete guide of 192 pages giving full details for growing Chrysanthemums in the garden and greenhouse. Includes hybridization, propagation, cutting, insects, diseases, etc. Per copy postpaid \$2.00

Small Aster-Flowered and Pompon Chrysanthemums

Under ordinary culture and without disbudding these will produce flowers under two inches in diameter. Their small size does not in any way detract from their effectiveness in the garden, and the dainty flower clusters are particularly useful for table and room decoration.

Acacia. Myriads of small, glittering, delightfully fragrant, Acacia-like blossoms covering the plants from late September on. The semi-double sulphur yellow flowers are about an inch in diameter. 2 ft.

Cheerfulness. Makes large plants of excellent form, covered with hundreds of small double yellow buttons.

Ethel. Superb bronze button. Very free flowering.

Gleam O'Gold. This splendid primrose yellow aptly named fairly gleams in the mellow October sunshine. Blooms early October. 2 ft.

Goblin. A distinct warm golden bronze attaining perfection for Hallowe'en decoration. Of airy graceful habit and very profuse. 2 ft.

Irene. Compact dwarf plant with an abundance of small white button-shaped flowers.

Jean Treadway. Popular small pink Aster-flowered.

Jewel. Wonderful ball-shaped lilac pompon. Very attractive and popular. Always greatly admired.

Judith Anderson. A vigorous variety producing great quantities of good sized button-shaped golden yellow flowers.

Ouray. Large bronze button of dazzling color.

Pomponette. A dwarf compact grower literally covered with charming yellow pompon flowers.

Ruth. Very strong wine-colored small Aster.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

Hardy Single-Flowered Chrysanthemums

The following list embraces the choicest and most popular single-flowered Hardy Chrysanthemums. Their usefulness, dainty appearance, and free-flowering habit have endeared them to all flower lovers.

Lovelight. Large pale pink duplex flowers on a vigorous plant. The plants are simply covered with flowers.

Nancy Copeland. A brilliant red Korean hybrid with wiry stem. Of strong constitution.

Princess. By all odds the best single white Chrysanthemum among the thousands we have raised. Early and large.

Sensation. Single yellow with every petal tipped scarlet. Very showy and reliable.

The Chief. An extremely attractive semi-double variety of large size. Brilliant scarlet and gold.

Venus. Single lilac-pink with lavender shading.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

Cushion Type

The well-deserved popularity of this type of dwarf compact growers has led us to prepare good stocks. We highly recommend the following varieties which have proved outstanding in our tests.

Amelia (Pink Cushion). Very compact and early. Free-flowering light rose. Should be kept pruned back until early August for best results.

King Cushion. Identical with Amelia excepting that the flowers are deep bronzy salmon with a suffusion of rose.

Pigmy Gold. A very distinct dwarf double yellow Korean Pompon growing not over 15 inches tall and producing a great profusion of bright yellow flowers during September and October. A great acquisition and wonderfully appropriate companion to the Cushion varieties.

Queen Cushion. The same type as Amelia and King Cushion but producing white flowers.

White Gull. This variety is distinctly of the Cushion type in growth but the flowers, which are pure white are more of a pompon shape.

Any of the above, 2-inch pots:
9c each; \$8.00 per 100.

Chrysanthemum rubellum Clara Curtis

Chrysanthemum rubellum was originally introduced in a pale pink form as Chrysoboltonia pulcherrima. Later it was offered as Chrysanthemum erubescens and finally as rubellum. It attained quite a bit of popularity as a border plant blooming throughout September. It is now, however, entirely superseded by the variety Clara Curtis which has considerably more merit. This variety has very pretty lilac-pink flowers borne on compact plants devoid of the straggly growth of rubellum. We highly recommend Clara Curtis as a September blooming subject for the garden. 2-inch pots 9c each; \$8.00 per 100.

September Jewels

Six Gorgeous September Jewels

We picked these six as the most outstanding colors from hundreds of selections made last year. All are vigorous, free-blooming, and perfectly hardy giving a glorious display during September and early October. Splendid for beds and for cutting. They grow 2 feet tall.

Aesir. Bright yellow ray petals with a deep golden yellow cushion. Gives a brilliant effect in the garden.

Freya. Light sulphur yellow shaded with picric yellow. Artistic large flowers of semi-double form, carried upright on strong plants.

Gudrun. Golden copper shaded with bronzy shrimp pink. An artistic flower of less regular formation than the others with several rows of the petals pointing slightly upward as well as sideways which adds a carefree effect.

Njorth. Amaranth pink petals showing a tendency towards spoon formation. Several rows of petals forming a sharp contrast to the brilliant golden yellow center.

Odin. Hellebore red. Graceful, well-rounded flowers composed of several rows of broad ray petals encircling a small golden yellow center.

Sigurd. Light coral red with carnelian shadings. A showy, extra free-flowering variety with a double row of ray petals around the deep golden yellow center.

Any of the above: 18c each; \$15.00 per 100.

Novelty for 1942 Debutante

A new Korean Hybrid Chrysanthemum of a light lemon yellow diffused with soft peach and light rose, blended to give a delightfully soft effect. The flowers are nearly double and measure more than 2 inches across; borne on vigorous free-branching plants, 2 feet tall, with healthy deep green foliage. The overwhelming profusion of blooms hides practically all of the foliage during the flowering season. 21c each; \$18.00 per 100.

Bearded Iris

10 Beautiful Bearded Iris

Alta California. Holds its place as one of the most worthwhile and sensational Iris grown. It is the tallest of all the new yellow Iris and its branching qualifies it for "A" rating either as an individual stalk or as mass bloom. Yellow Iris have long been recognized as being the "spark" that brings out the fullest beauty of any Iris garden and Alta California serves this purpose to perfection. 48 inches.

Buechley's Giant. Early. An Iris giant in size and height and one of the ten largest and best. Huge brilliant flowers of perfect form in a soft to medium blue effect. 50 inches.

Coppersmith. A very tall and robust growing Iris. Not a new variety but worthy of a place in the garden because of its freedom of bloom, large rich copper-bronze flowers, and good foliage.

Depute Nomblot. Standards light bronzy rose-purple. Falls rosy red. 4 feet.

Indian Chief. Without a peer among the medium tall reds of its color shade and blooms earlier than most when good "red" Iris are scarce. Bronzy violet standards with falls of Dahlia-carmine. A good doer everywhere and should be in every garden. Early. 32 inches.

Jean Cayeux. A smooth soft light buff described as "Coffee colored." Tall and very stately. 36 inches.

Los Angeles. The whiteness of fresh snow with a faint edge of lavender. 40 inches.

President Pilkington. Large, of bold form, well-branched, many buds to stalk and medium tall. Standards vinaceous buff underlaid old gold, with falls of soft violet faintly edged silvery brown. The elegant dignity of this Iris gives it a charm that is difficult to describe. Midseason. 40 inches.

Venus de Milo. Gigantic new white. Considered by many as the best white. A perfect flower in every way.

William Mohr. Most orchid-like of all Iris, this unusual hybrid is the most distinct variety grown. The leaves always are small but the flowers are simply immense. The ground color is pale lilac, standards flushed darker, the whole flower beautifully veined manganese-violet. Stems strong and rigid, 20 to 24 inches, usually four flowers on each. Early.
